### Real-Time Power Sport Tracking and Protection.

Keeping track of company power sport vehicles has never been quite this easy. Bahamas Asset Tracking developed the X4000BE PowerSport GPS tracking solution for dealers and rental companies seeking the best real-time vehicle tracking device available.

Using GPS data and cellular coverage under the GSM/GPRS network, the X4000BE PowerSport provides motion sensor detection, an internal battery to monitor main disconnects, starter disable and is a perfect cost efficient, low data asset tracking solution for your power sport vehicles.

Actionable data, such as the location of a trailer or power sport vehicle, means the difference between spending or saving thousands in replacing stolen assets and repairing damaged inventory.

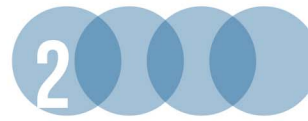

Backed by a dedicated customer support staff and a cutting-edge, on-site technical support team, Bahamas Asset Tracking is ready to help your company reap the benefits of reliable asset tracking and monitoring. The actionable data provided by the real-time insight of the X4000BE Power Sport is a valuable resource your company needs to begin saving money today.

### Key Features

The X4000BE PowerSport is a cost effective, innovative hardware and software solution with features designed to encourage business growth by increasing company asset monitoring and protection.

- Real-time Tracking and Reports
- Coverage and Communication
- Power and Durability

# Real Time TRACKING + REPORTS

with the X4000BE PowerSport

## Actionable Insight Improves Asset Monitoring and Vehicle Location

Having real-time data on a large inventory of power sport vehicles is important when your a rental company or power sport dealership. Got a boater stranded on the lake? An ATV with a flat tire out on a trail? Worried about thieves making off with your livelihood?

A GPS tracking and reporting solution such as the X4000BE PowerSport will help to improve asset monitoring and vehicle location, while organizing operations and streamlining your companies power sport management needs.
